

KS1 Plants and animals package

This is hands-on exploration of the woodland is to investigate growing plants and woodland animals through the seasons.

We will play games that help the children connect to the world of the plants and animals and how they survive in the wild. The leader will create challenges in groups to allow the children to work in teams with an adult. After we have walked and explored the wood we will then gather the children and adults in their groups and have the opportunity to choose a woodland animal and make a home using plant/natural materials found.

We provide a rich environment roofed only by sky (and a few gems from our own store cupboard).
